Experience

Homer(acquired by Speakaboos)   New York, NY - Remote
Full Stack Software Engineer   *February 2017 - Present*
Improved performance on the webapp by doing HTTP optimizations. Worked on the user onboarding for the webapp with JavaScript, React, and Jest. Built content API with GraphQL, TypeScript, Node.js, Koa, Jest, Docker, and Redis. Developed CMS backend with Node.js, Express, Mocha, and S3. Made the CI pipelines for testing the CMS/API, processing assets, and deploying to staging/production using Jenkins, Groovy, Node.js, and Elastic Beanstalk.

Speakaboos   New York, NY
Front End Software Engineer   *February 2016 - January 2017*
Developed the parent/teacher dashboard by using JavaScript, React, CSS Modules, D3.js, and SVG. Improved conversion by running A/B tests while working on the redesign of the webapp. Incrementally refactor the webapp with Node.js, JavaScript, React, and CSS Modules. Created a visual style guide by using HTML, Sass, and JavaScript.

Freelance   Remote
Full Stack Web Developer   *July 2015 - January 2016*
o Anime Center - Fixed upcoming episode, anime pagination, latest episode link on each anime page, anime relations, and caching system. Rewrote most of the backend with the Laravel PHP framework. Redesigned the MySQL schema, added foreign keys, renamed columns to be more descriptive, and removed unnecessary/duplicate data.
o Country Lyrics - Made the MySQL schema, the PHP backend with Laravel, the Python scraper with Scrapy, and the frontend with Sass/JavaScript. Used the Youtube API to attach songs to lyrics. Contributed to plyr, an open source media player, to convert the LESS files to Sass.

BitBang Estudio Digital   Santiago, Chile
Front End Web Developer   *January 2015 - June 2015*
Developed the frontend for the single page applications Plato de America, and Apuesto por Chile using HTML, Sass, and JavaScript. Built Latam Factors, and CChC using HTML, Sass, JavaScript, and PHP. Developed the Abril Intranet frontend using HTML, Sass, and JavaScript.

Bucarest Art   Santiago, Chile
Web Developer   *July 2014 - December 2014*
Increased revenue by enhancing SEO. Built a custom WordPress theme, and plugins to add new functionality using HTML, Sass, PHP, and JavaScript.

Freelance   Remote
Web Developer   *January 2014 - June 2014*
Mainly work with HTML, Sass, JavaScript, and PHP to built Bucarest Art, Compro Antiguedades, and Clinica los Coihues. Fixed a couple bugs and added new features to the Siete Comunicaciones website.
